Since its creation, Valmont has dedicated its savoir-faire to the field of anti-aging, offering professional treatments that combine expertise, high-performance products and precise gestures.

Faithful to the concept of cellular therapy, Valmont delved into the very nucleus of the skin's cells to find molecules with peerless anti-aging properties: DNA and RNA. Acting together in Valmont beauty care treatments, this dynamic duo strengthens and stimulates cells suffering from the effects of time and everyday aggression, revealing sublime and youthfully radiant skin.

Featuring unique and exclusive care protocols, Valmont treatments stand out from all others thanks to the “butterfly motion” that sets the tone for each program.

A world away from traditional beauty care, Valmont treatments are composed like a symphony. The cadence of the movements reconciles opposites; it is at once enchanting and unexpected. You will leave the spa both relaxed and invigorated, your skin well rested and reawakened.

Each beauty ritual benefits from its own iconic treatment, with a name inspired by the brand's Swiss heritage.

Lose yourself in a journey of initiation and travel to the heart of Valmont's homeland.

Vitality of the Glaciers

The skin is regenerated, radiant and firmer.
A vital treatment for overstrained, lifeless skin.

Vitality of the Glaciers is the first iconic skin treatment designed by Valmont, and it reflects the technical prowess of the Swiss anti-aging expert brand. A beauty booster, this face treatment stimulates the skin's energy and cell renewal - both of which diminish over time. After the treatment, the complexion is once again fresh and radiant, features are relaxed, and the skin has never been fuller.

The plus of this treatment is the 99.9% pure native collagen mask that plumps the tissues and redefines the contours of the face - a biological facelift!

In the 90-minute intensive version of the treatment, the client enjoys a regenerating and revitalizing cure: Cellular Complex Vitality. As a final touch, products from the Prime Generation line fill the skin with anti-aging and anti-wrinkle ingredients to treat those areas that bear the signs of time.

Vitality of the Glaciers is suitable for all skin types and is especially recommended for city dwellers for its oxygenating and detoxifying action.

The art of «Ko Bi Do»

The Kobido was created by two masters of Anma (Japanese massage method) in 1472 at Suruga Japan.

These two masters participated in a competition to assess their proficiency by practicing facial care based on a technique of Anma, "the Kyoku -te", a special percussion technique with folded hands.

During the competition the two masters recognized the skills of each and worked together to create a new technique called Kobido etymologically ancestral method of beauty that can be translated as the "traditional way of beauty".

It is a true natural lifting techniques by combining percussion, smoothing techniques and drainage and specific pressure.

It also requires a major personal investment because the gestures and the practice of linking the various techniques must look like a broom dance performed with hands in total harmony and fluidity that characterizes the requirement of this ancestral care which was developed over the years.
